

# SAFETY AND RELIABILITY SOCIETY LONDON BRANCH

---

## Healthcare: Understanding the Safety of Current Systems and Future Technologies

**Dr Mark Sujan (Human Reliability Associates)**

**Dr Dominic Furniss (Human Reliability Associates)**

**Dr Chris Vincent (PDD Group)**

**Wednesday 22nd May 2019**

The use of new forms of medical technology offer tremendous potential for improving health, care, and treatment. The types of intervention are an evolving science and ensuring the effectiveness, safety, and security of such interventions is vital. This event aims to discuss the methods, challenges, and opportunities for achieving safety. Underpinning this is the need for a compelling, comprehensible and valid argument that the system is acceptably safe.

We will have three talks covering AI and software safety, smart pumps and intravenous infusion administration, medical device testing and regulations, followed by a Q&A

The meeting will begin at 1730, for an 1800 start and will finish by 1930. We will then have drinks in a local pub. Meetings are open to all, you do not need to be a member of SaRS to attend

## **London Branch AGM**

**London Branch AGM will be held 1715-1745**

**Book here:** <https://sars-healthcare-safety.eventbrite.co.uk>
