

Service-based Safety Assurance: A provider approach in a challenging environment

Kevin King BSc(Hons) CEng MIET – Product Safety Engineering Manager at BAE Systems
Steve Elliott BEng(Hons) CEng MIET – Engineering Manager – Safety, Environmental and Governance at BAE Systems

6:30pm, Tuesday 17th September 2019, at
BMT Defence & Security UK Ltd, Whiteley, PO15 7AH

In the 21st century, safety assurance in the defence industry in the UK has had to evolve to encompass the provision of services in safety-related environments. When considered in the context of upkeep and maintenance of assets ranging from the 800 year old HM Naval Base Portsmouth to the state of the art HMS Queen Elizabeth Aircraft Carrier, how such services are safely-managed is paramount. This presentation sets out an approach to Product Safety management when the product is the “provision of a service”. Of importance is the organisation’s recognition of their accountability for the services they provide throughout the period the service is being delivered. The work underpinning this paper has contributed to the ongoing efforts of the SCSC Service Assurance Working Group and the guidance being developed

Spaces for attendees and parking spaces are limited and must be booked in advance – to reserve either or both, please contact Mark Wraith (mark.wraith@bmtglobal.com).

Schedule

6.00 pm Arrival at BMT APL, Whiteley, PO15 7AH

6.30 pm Start

8.00 pm (approx) Finish

**Non-SaRS members welcome at all
branch talks**
